PRODUCT VISION

Proficient in translating technical constraints into user-centric roadmaps and collaborating with engineering to ship products that drive measurable business impact.

EXPERIENCE

AppCair

Aug. 2025 – Dec. 2025

Data Science Intern

- Identified performance bottleneck in engineer workflows; automated data collection, reducing profiling time by 60%.
- Defined data strategy for 250k+ records pipeline, enabling real-time power and runtime predictions for engineers.
- Owned optimization roadmap using algorithmic search to recommend configurations, reducing tuning latency by 22%.

West Bengal Transport Department

May. 2024 – July. 2024

Operations Intern

- Conducted on-ground depot visits and coordinated with traffic officials to identify operational bottlenecks for routes.
- Engaged with depot staff and officials to document ticketing workflows, surfacing gaps in record management.
- Analyzed 50+ bus routes to identify peak revenue timings, demand patterns, and high-traffic operational days.

PRODUCT INITIATIVES

NYAYA AI: SOP-Compliant Case Management Platform | IndicBERT

- Observed case documentation inefficiencies; designed SOP-compliant app with guided workflows to reduce manual workload.
- Validated with police hackathon judges; tracked 65% manual drafting reduction and demonstrated product-market fit.

Priority Solver: AI-Powered Task Prioritization for Knowledge Workers | Agentic Workflow

- Designed multi-agent CrewAI pipeline with Task Analyst, Priority Strategist, and Planning Manager agents.
- Validated AI prioritization system with 5 knowledge workers, achieving 40% reduction in daily planning overhead.
- Identified priority management as top pain point via structured analysis of 500+ G2 and Capterra reviews.

OfferFlow: AI-Powered Intern Hiring Workflow Automation | Process Automation

- Identified offer bottlenecks through research, targeting workflows costing early-stage startups 15+ hours per hire.
- Designed RAG agentic system reducing offer creation from 1-2 hours to 10 minutes automatically.
- Built MVP with Claude API, FAISS vectors, and policy-aware generation; demonstrated 85% time savings.

EDUCATION

BITS Pilani KK Birla Goa Campus

Oct. 2022 – May 2026

B.E in Chemical Engineering

Goa

- **Coursework:** Data Structures, Algorithms, Object Oriented Programming, Machine Learning
- **Positions of Responsibility:** Core Member, Abhivyakti (Arts Club); Crew Member, Google Developer Student Club

SKILLS

Product Strategy : User research, Feature prioritization, Metrics & KPI definition, Competitive analysis

AI/ML Expertise : LLMs, RAG, Generative AI, ML model evaluation, Performance optimization, Data pipeline design

Technical Skills : Python, FastAPI, Streamlit, Prompt Engineering, LangChain, Docker, SQL
